PROFESSIONAL SUMMARY

Data Engineer with 5+ years of experience delivering large-scale, production-grade data platforms on **Microsoft Azure**. Specialized in **end-to-end ETL/ELT development**, **legacy-to-cloud migration**, and **performance tuning** using **Azure Synapse, PySpark, SQL, Azure Data Factory, Databricks, ADLS Gen2, and Delta Lake**. Delivered **68 production pipelines** and **176+ CI jobs** processing **900M+ to 1.6B+ records**, driving reliable enterprise analytics across **Microsoft** and **healthcare** programs.

TECHNICAL SKILLS

Cloud & Azure: Azure Synapse Analytics, Azure Data Factory, ADLS Gen2, Azure Databricks, Managed Identity, Azure CLI	Data Engineering: ETL/ELT, Data Pipelines, Data Migration, Data Validation, Metadata-Driven Pipelines, Performance Tuning
Programming: Python, PySpark, SQL, Spark SQL, Shell Scripting, HQL	Tools & Other: Delta Lake, Snowflake, Power BI, Event Hub, ASG-Zena, Git, Agile

PROFESSIONAL EXPERIENCE

Infosys Ltd. — Data Engineer / Specialist Programmer L2 Client: Microsoft — CDL Cosmos Migration & Surface Devices Analytics - Led migration of legacy CDL Cosmos workloads from Gen1 to Gen2 by converting SCOPE/U-SQL logic into Azure Synapse notebooks, modernizing legacy processing for scalable cloud execution. - Engineered validation and transformation workflows for high-volume datasets of 900M+ to 1.6B+ records across billing, subscription, OMS, token, and finance domains, ensuring accurate large-scale data delivery. - Delivered 176+ CI jobs and 68 end-to-end production pipelines on the Azure Data Platform, supporting reliable enterprise analytics and reporting. - Improved production reliability by resolving metadata, reducer logic, primary-key mapping, and validation-flow defects, reducing pipeline failures across critical workloads. - Reduced validation and root-cause-analysis time through PySpark automation and AI-assisted troubleshooting, accelerating issue resolution. - Built and optimized enterprise pipelines using Event Hub, ADLS Gen2, Synapse, Databricks, PySpark, and SQL, powering downstream analytics and Power BI reporting. - Strengthened platform security by implementing Managed Identity-based authentication across Synapse and Databricks, eliminating credential dependencies.	<i>Mar 2025 – Present Richardson, TX (Onsite)</i>
Infosys Ltd. — Specialist Programmer Client: Blue Shield of California & HCSC — Healthcare Data Migration - Designed and delivered Azure Synapse, PySpark, and SQL pipelines to migrate on-premises healthcare data (Netezza) to ADLS Gen2, enabling cloud-based analytics. - Built transformation workflows for patient, claims, survey, and laboratory datasets, feeding trusted data to downstream analytics and business applications. - Developed reusable ingestion and transformation frameworks that improved consistency and cut delivery time across multiple subject areas. - Converted legacy SQL and HQL logic into PySpark and Spark SQL, enabling scalable cloud-native processing of large healthcare datasets. - Automated incremental data loads using shell scripting and Azure CLI orchestrated through ASG-Zena, reducing manual intervention. - Built an Audit-Balance-Check framework that validated record counts and file sizes across raw, curated, and gold layers, improving data quality and trust.	<i>Jan 2022 – Feb 2025 Pune, India</i>
Infosys Ltd. — Digital Specialist Engineer Cloud Data Modernization & ETL Development - Designed and developed ETL integration pipelines using Python on Spark, streamlining cloud data processing. - Built PySpark notebooks in Databricks to transform and load data into curated zones, improving processing efficiency. - Optimized Spark SQL queries into tuned RDD and DataFrame transformations, improving execution performance. - Developed pipelines to load transformed Delta tables into Snowflake, enabling reliable downstream consumption. - Processed multiple data formats including JSON, CSV, Parquet, and Delta on Azure Synapse Notebooks using PySpark.	<i>Jan 2021 – Dec 2021 Pune, India</i>

CERTIFICATIONS - Microsoft Certified: Azure Data Engineer Associate (DP-203) - Microsoft Certified: Fabric Data Engineer Associate (DP-700) - Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) - Microsoft Certified: Azure AI Engineer Associate (AI-102) - Databricks Certified Data Engineer Associate	EDUCATION & ACHIEVEMENTS Bachelor of Technology (B.Tech) Lakshmi Narain College of Technology & Science, Bhopal 2016 – 2020 90% Insta Award — Recognized for quality code delivery during large-scale data migration projects. Gold Medal — National Programme on Technical Enhanced Learning (Java Programming).
